Granite Shield
Permanent Granite Sealer

GSTM

*Seal Your Stone Surfaces
Permanently and Safeguard
Your Investment*

What Makes Granite Shield's Granite Lifetime Sealer Different?

Customers now are seeking granite countertops that offer a lifetime warranty against staining to protect their investment. Granite Shield, the first and only company who can offer the beauty of natural true granite complete with a lifetime warranty against stains or discoloring. With granite sealed by Granite Shield you don't have to worry about rushing to wipe up spills, worry about acidic liquids, alcohol, using coasters, placemats or use special cleaners ever again.

Craig Phillips is the creator of the Granite Shield permanent granite lifetime sealing process. Granite Shield was started and developed in 2002. Many independent granite fabricators throughout the United States have been offering their customers Granite Shield's permanent lifetime sealing process since 2002.

Granite Shield achieves their lifetime sealing process for granite using proprietary catalyzing polymers. These chemicals are not standard sealers purchased over the counter but specifically made for Granite Shield by their chemists and can't be found anywhere else or

used by anyone else other than an authorized Granite Shield applicator or fabricator.

Depending if the granite is considered light, medium or dark, each type of stone takes a different application process with catalyzing polymers and

then is capped with a permanent carbon crystal sealant which then locks the catalyzing polymer into the stone. The carbon crystal sealant

forms a molecular bond with the granite which can not be removed thus creating a lifetime seal plus leaving your granite more vibrant, smoother, shinier and maintenance free. The Granite Shield sealing process has no wax, plastic, silicone or resins and it is a breathable, penetrating sealer. It is not topical and will not scratch or yellow.

Granite Shield is the first and only to have this process, don't be fooled by imitators even if it's a well known company. If it doesn't say Granite Shield, it's not permanently shielded with a lifetime warranty like Granite Shield.

Protect your stone investment, even from the cutest baby around. Yours!

Granite Shield protected countertops can be maintained with ammonia, bleach or denatured alcohol to be assured your surfaces are free of harmful bacteria. Granite Shield is the first granite sealer to be Kosher certified.

Granite Shield

Use & Care

Granite Shield applies a glass like finish on granite. With Granite Shield's permanent lifetime warranty & maintenance free sealed granite you don't need special cleaners to clean and maintain your granite. You can even use an over the counter window cleaner with ammonia. Granite Shield recommends Windex with ammonia or Clorox bleach with a microfiber towel on glossy granite sealed by Granite Shield to clean the granite. You don't have to worry about cleaning the spill immediately. We don't recommend using a cleaner that has polishes or waxes because it will only build up on your granite leaving a waxy, dull, smeary build up. Should that occur with granite sealed by Granite Shield you can just go down to the local hardware store and buy denatured alcohol to remove the residue and your granite will look shiny, repellent and brand new again. So with granite sealed with Granite Shield just throw away your granite cleaners because they aren't needed.

With granite by Granite Shield Countertops or granite sealed by Granite Shield you don't have to worry about rushing to wipe up spills, worry about acidic liquids, alcohol, using coasters or placemats ever again. With granite sealed permanently by Granite Shield we mean it's permanently sealed, NEVER HAS TO BE SEALED AGAIN, has a LIFETIME WARRANTY, not a limited warranty limiting you to use special cleaners and follow special maintenance procedures like other companies. However Granite Shield does carry a line of aftercare products for customers who want to purchase cleaners and germ fighters that are created and developed by Granite Shield's CEO/President Craig Phillips, Debbie Burton-Phillips Vice President and Granite Shield's chemists.

Granite Shield

Testimonials

"Wow for Granite Shield! Once again my son put a container with oil on the bottom on top of my very light colored granite counter top. Only this time it is shielded. No stain. Yes. Granite Shield is wonderful."

Thank You,
P. Symonds
San Francisco, California

"I wanted to inquire as to who I would contact to have an appointment done for the Granite Shield. I have granite in my kitchen and had the Granite Shield applied and have had no problems. However, my parents, who have the same granite as I do did not have the Granite Shield applied and their granite has darkened in certain spots, due to some staining. I was wondering who would be the contact to find out about having the stains removed, if possible and then having the Granite Shield applied?"

Thanks,
J.A. Calabrese, CFP
East Longmeadow, Massachusetts

"Just a note of how great your product is.... not just two hours after having your product put on my brand new granite kitchen counters, I spilled a bottle of cabernet. Like magic, it wiped right off with no effect on the granite at all."

Sincerely,
D. Filipovich
Henderson, Nevada

GRANITE

SHIELD

Granite Shield's Permanent Lifetime Sealer Verses Competitor Sealers

1. 5 deep penetrating chemicals for permanent bonding protection.
2. Leaves granite the same natural color only a deeper penetrating shine.
3. Less than 3 ounces of each chemical seals a 60 sq. ft. kitchen.
4. Granite Shield is a flameproof seal, heat will not affect Granite Shield.
5. Granite Shield becomes inert after application and meets FDA and AMA guidelines. First granite sealer that is Kosher certified.
6. Deep penetration of chemical lifts contaminants out of stone leaving stone cleaner and permanently bonded through catalyzing carbon crystal.
7. No off-gassing and countertops are ready immediately for use.
8. Floral smelling chemical leaves pleasant scent after application and dissipates instantly.
9. Warranty is against any failure of the seal and will replace material if the stone cannot be restored to original state.
10. Sealer can be added to any granite of your choice anywhere in the world to new or existing granite countertops.
11. Granite Shield doesn't leave a dull, hazy film.
12. The Granite Shield process doesn't contain wax, plastic, silicone, resins or epoxies and is not topical.
13. Granite Shield doesn't have a "limited" warranty on granite like many Granite Shield competitors do.
14. Granite Shield doesn't have a limited color pallet selection and can be applied to glossy and honed granite.
15. The price factor. Choosing your own granite fabricator, the granite slab of your choice with Granite Shield will save you a lot of money.
