

GRANITE SHIELD

Maintenance and Cleaning instructions for surfaces sealed with Granite Shield.

For glossy granite sealed with the Granite Shield process no specific cleaner is recommended. Over the counter granite cleaners or polishers aren't recommended or needed. Soap and water shouldn't be used because it can leave a dull, smeary, lifeless mess on your granite but can be corrected with denatured alcohol. Harsh chemicals such as Goo Gone, Ajax, Comet, CLR or Lime-Away should never be used on granite or any type of natural stone. When cleaning your glossy granite sealed with the Granite Shield process think of your granite as glass. For glossy granite sealed with the Granite Shield process cleaners such as Windex ammonia based cleaner, Clorox bleach wipes, denatured alcohol or a 50/50 solution of denatured alcohol and water with a clean microfiber towel is the best over the counter cleaners and the preferred cleaner is Granite Shield's Granite Kleen and Kleen N Shine with a clean microfiber towel. A clean microfiber towel on granite should always be used instead of a paper towel or terry cloth. Water left to puddle around the faucet at some point should be wiped up and not left to dry because it will leave a residue on the surface. An occasional cleaning around the faucet area on the surface may need to be cleaned with a non abrasive cleaner such as Granite Shield's Silicabright from not wiping up water leaving a residue when washing hands. An occasional cleaning (such as once a month) should be done removing small appliances, decorations, soap dishes etc. to do a thorough cleaning. For honed granite a neutral stone cleaner and not required but should use Granite Shield's Kleen N Seal Rejuvenate cleaner and white terry cloth towel.

Glass, stainless steel and porcelain is under warranty for 5 years from the time of application. Glass, stainless steel, porcelain and sinks need to be maintained with Granite Shield's Kleen N Shine Repellent cleaner at least once a month. Shower doors need to be cleaned with the non abrasive cleaner Silicabright and a non abrasive cleaning pad occasionally along with Granite Shield's Kleen N Shine Repellent cleaner used monthly for warranty to be valid. Recommended cleaners are Granite Shield's Silicabright, Granite Kleen and Kleen N Shine. Do not use oil or mineral oil to clean stainless steel it causes fingerprinting and will void the Granite Shield warranty. Porcelain needs to be cleaned with a non abrasive cleaner such as Soft Scrub or Silicabright and non abrasive cleaning pad at least once a month along with Granite Shield's Kleen N Shine Repellent cleaner for warranty to be valid. The warranty is regarding repellency and to be easier to clean and not for staining. Includes porcelain toilets and sinks and sinks such as real granite, composite granite and engineered stone.

For countertops and other surfaces: granite, marble, glass and stainless steel:

For daily cleaning use a neutral stone cleaner such as Nustone Kleen by Granite Shield.
