

GRANITE SHIELD

**Floors, Tops, Walls, Kitchens, Baths & Halls
We Seal it All!**

SEAL YOUR COUNTERTOPS PERMANENTLY WITH GRANITE SHIELD

Granite Shield is a product that reacts on a molecular level with oxygen in your granite countertops. It then forms a crystalline carbon seal which makes your counters water proof and stain proof.

WHY USE GRANITE SHIELD?

Why use Granite Shield on your granite countertops? The standard sealers in the industry are penetrating sealers. This means they are absorbed down into the porous granite & away from the surface. Oils & stains can still penetrate the surface damaging your granite countertops. Granite Shield forms a waterproof barrier on the surface, filling in the uneven nooks & crevices on your countertops. This barrier stops oils & stains from entering your granite. Granite Shield will last the lifetime of your granite. Your granite will never have to be sealed again, will be maintenance free plus smoother & shinier.
